**Chassis School Just \$249**

Bob Harris' Race Tech Dirt Chassis Schools are designed to help you understand dirt chassis set-up so each race team that attends can improve their race program. Whether you race a **Modified, SportMod, B Mod, Super Stock Car, or a Hobby Stock Race Car** this is the best way to learn about your race car and optimize your race equipment's performance. We want you to get a full understanding of your chassis, the suspensions and the track so you can make the right adjustments for your race car and driver. **This class is suitable for any level of racing.**

Drivers, owners and crew members this class will help you understand your race car better! It doesn't matter how great your equipment is if you don't know how to use it. Often times, it's not the race team that has invested the most money on fancy equipment that wins in the end, it's the race team that invested in the most important asset they have – **themselves**. It's important to understand how everything on your race car works, so you can make the correct adjustments at the track. The knowledge you'll gain from attending our school will take the guess work out of the chassis set up & chassis tuning. We guarantee you will gain valuable knowledge and education about your race car.
